INDEX OF AUTHORS VOLUME 22

A

Anderson, M. and Kunkel, J. G. Cleaning insect oocytes by dissection and enzyme treatment 349
Anselme, K., Julliard, K. and Blaineau, S. Degradation of metal-labeled collagen implants: ultrastructural and X-ray microanalysis 81
Ashton, F. T. *see* Beinbrech, Ashton and Pepe 803

B

Baerwald, R. J. *see* Williamson and Baerwald 389
Bay, B. H. *see* Sit, Bay and Wong 785
Beinbrech, G., Ashton, F. T. and Pepe, F. A. Orientation of the backbone structure of myosin filaments in relaxed and rigor muscles of the housefly: evidence for non-equivalent crossbridge positions at the surface of thick filaments 863
Bettex, M. *see* Bettex-Galland, Boillat and Bettex 93
Bettex-Galland, M., Boillat, C. and Bettex, M. Chondroclasts in osteoneogenesis 93
Bigliardi, E. *see* Dallai, Bigliardi and Lane 359
Biliński, S. M., Ksiażkiewicz-Kapralska, M. and Štys, P. Unusual organization of the tropharium in the telotrophic ovarioles of an insect, *Saldula saltatoria* 213
Blaineau, S. *see* Anselme, Julliard and Blaineau 81
Boillat, C. *see* Bettex-Galland, Boillat and Bettex 93
Brain, A. P. R. *see* Turdiyev, Prus, Brain and Quinn 385
Brannen, A. L. *see* Chandler and Brannen 427
Brough, C. N. and Dixon, A. F. G. Ultrastructural features of egg development in oviparae of the vetch aphid, *Megoura viciae* Buckton 51

C

Campbell, R. D. Transmission of symbiotic algae through sexual reproduction in hydra: movement of algae into the oocyte 137
Carpentier, G. *see* Goudeau, Lachaise, Carpentier and Goxe 269
Chandler, D. B. and Brannen, A. L. Interstitial macrophage subpopulations: responsiveness to chemotactic stimuli 427
Chernoff, E. A. G., Munck, C. M., Mendelsohn, L. G. and Egar, M. W. Primary culture of axolotl spinal cord ependymal cells 601
Chernoff, E. A. G. and Robertson, S. Epidermal growth factor and the onset of epithelial epidermal wound healing 123
Coote, G. *see* Gauldie, Coote, West and Radtke 645
Crouau, Y. Sensory organs in a cavernicolous insect after cryofixation without cryoprotectants: a comparative ultrastructural study 245
Cruz, Y. P. Mosaicism in the mouse trophectoderm 103
Curie, G. *see* Lemoine, Millot, Curie and Delachambre 177
Curl, J. L. *see* Russell, Weiss, Goh and Curl 263

D

Dadoune, J.-P. *see* Fouquet, Kann and Dadoune 291
Dallai, R., Bigliardi, E. and Lane, N. J. Intercellular junctions in myriapods 359
Davis, R. W. *see* Rankin and Davis 879
De Lanversin, A. *see* Hartung, Wachtler, De Lanversin, Fouet, Schwarzacher and Stahl 25
De Loof, A. *see* Meulemans and De Loof 283
Del Castillo, J. *see* Smith, Del Castillo, Morales and Luke 157
Delachambre, J. *see* Lemoine, Millot, Curie and Delachambre 177
Denefle, J. P. and Zhu, Q. L. Redistribution of fibronectin and keratin localization patterns in early wounded confluent PtK2 cells 575
Dixon, A. F. G. *see* Brough and Dixon 51
Dougherty, W. J. SEM observations on the interfacial surface of the cement of the adult barnacle, attached to natural and synthetic adherends 463
Duvert, M. and Salat, C. Ultrastructural and cytochemical studies on the connective tissue of chaetognaths 865
Duvert, M. and Salat, C. Ultrastructural studies on the fins of chaetognaths 853

E

Edwards, C. *see* Furuya, Edwards and Ornberg 615
Egar, M. W. *see* Chernoff, Munck, Mendelsohn and Egar 601
Ehrlich, H. P. and Rajaratnam, J. B. M. Cell locomotion forces versus cell contraction forces for collagen lattice contraction: An *in vitro* model of wound contraction 407
El Sherief, A. *see* Hunt and El Sherief 191

F

Falleni, A. and Gremigni, V. Ultrastructural study of oogenesis in the acoel turbellarian *Convoluta* 301
Farley, R. D. Regulation of air and blood flow through the booklungs of the desert scorpion, *Paruroctonus mesaensis* 547

Fernández, A. *see* Trujillo-Cenóz, Fernández and Radmilovich 811
Fleminger, G. *see* Halperin, Fleminger, Ovadia, Kraicer and Hadas 779
Fogal, T. *see* Piezzi, Gutierrez and Fogal 697
Fouet, C. *see* Hartung, Wachtler, De Lanversin, Fouet, Schwarzacher and Stahl 25
Fouquet, J.-P., Kann, M.-L. and Dadoune, J.-P. Immunoelectron microscopic distribution of actin in hamster spermatids and epididymal, capacitated and acrosome-reacted spermatozoa 291
Furuya, S., Edwards, C. and Ornberg, R. Morphological behavior of cultured bovine adrenal medulla capillary endothelial cells 615

G

Gauldie, R. W., Coote, G., West, I. F. and Radtke, R. L. The influence of temperature on the fluorine and calcium composition of fish scales 645
Goh, J. C. *see* Russell, Weiss, Goh and Curl 263
Goudeau, M., Lachaise, F., Carpentier, G. and Goxe, B. High titers of ecdysteroids are associated with the secretory process of embryonic envelopes in the European lobster 269
Goxe, B. *see* Goudeau, Lachaise, Carpentier and Goxe 269
Gremigni, V. *see* Falleni and Gremigni 301
Griffond, B. and Mounzih, K. Innervation of the dorsal body cells of *Helix aspersa:* immunocytochemical evidence for the presence of FMRF amide-like substances in nerves and synapses 741
Gunawardana, V. K. Ultrastructural localisation of alkaline phosphatase in the intertubular tissue of the testis in the domestic fowl 113
Gutierrez, L. *see* Piezzi, Gutierrez and Fogal 697

INDEX OF SUBJECTS VOLUME 22

A

Absorption, water vapour, -cellular differentiation in relation to the rectal complex of the mealworm, *Tenebrio molitor* 925
Acoel, turbellarian *Convoluta*, ultrastructural study of oogenesis in the 301
—, platyhelminth, ultrastructure of the epidermal eyespots of 541
Acrosome-reacted spermatozoa, immunoelectron microscopic distribution of actin in hamster spermatids 291
Actin, immunoelectron microscopic distribution of in hamster spermatids, capacitated and acrosome-reacted spermatozoa 291
Adherends, natural and synthetic, SEM observations on the interfacial surface of the cement of the adult barnacle, attached to 463
Adrenal medulla, cultured bovine capillary endothelial cells, morphological behavior of 615
Adrenal cortex, neonatal and adult, : intercellular permeability to nickel nitrate 697
Algae, symbiotic, transmission of, through sexual reproduction in hydra: movement of algae into oocyte 137
Alkaline phosphatase, ultrastructural localisation of, in the inter-tubular tissue of the testis in the domestic fowl 113
Amphibian, axolotl, primary culture of spinal cord ependymal cells 601
—, cell junctions of the notochord of *Xenopus laevis* tadpoles 149
Angiogenesis, is associated with collagenous protein synthesis and degradation in the chick chorioallantoic membrane 419
Anlagen, of sensilla, morphogenesis of the antenna of the male silkmoth, *Antheraea polyphemus*. II. Differential mitoses of 'dark' precursor cells create the 705
Antenna, morphogenesis of, of the male silkmoth, *Antheraea polyphemus*. II. Differential mitoses of 'dark' precursor cells create the Anlagen of sensilla 705
Antiport, -mediated cell retraction: viable rounding and distinctive endocytosis 785
Apolysis, in the male silkmoth, *Antheraea polyphemus* 319
Avian, surrogate eggs, differentiation and function of chorioallantoic cells in 65
Axolotl, spinal cord ependymal cells, primary culture of 601

B

Barnacle, adult attached to natural and synthetic adherends, SEM observations on the interfacial surface of the cement of the, 463
Biliary atresia, ultrastructural features of degeneration of the gallbladder during, in lamprey 477
Blood cell surfaces, of the middle Asian tortoise *Testudo horsfieldi*, scanning electron microscopic study of 385
Bone, -chondroclasts in osteoneogenesis 93
Booklungs, of the desert scorpion, *Paruroctonus mesaensis*, regulation of air and blood flow through 547
Brain, ontogenetic development of, in the platyhelminth *Fasciola hepatica* 39
5-bromo-2-deoxyuridine, immunohistochemical localisation of the thymidine analogue in insect tissue: Preservation of cellular ultrastructure 311

C

Calcium, and fluorine composition of fish scales, the influence of temperature on 645
Capacitated, -epididymal and acrosome-reacted spermatozoa, immunoelectron microscopic distribution of actin in hamster spermatids and 291
Cardiac muscle, in cultured adult cells, differential response to a tumor promotor: analysis of myofibrillar organization of 655
Casein, and lactoferrin, *in vitro* culture of cryopreserved bovine mammary cells on collagen gels: synthesis and secretion of 583
Cell aggregation, in continuous cell lines, the ultrastructure of imaginal disc cells in primary cultures and during 749
—, junctions, of the notochord of *Xenopus laevis* tadpoles 149
—, lines, continuous the ultrastructure of imaginal disc cells in primary cultures and during cell aggregation in 749
—, locomotion, forces versus cell contraction forces for collagen lattice contraction: An in vitro model of wound contraction 407
—, retraction -antiport-mediated viable rounding and distinctive endocytosis 785
Cement, of the adult barnacle, attached to natural and synthetic adherends, SEM observations on the interfacial surface of the 463
Chaetognaths, ultrastructural studies on the fins of 853

—, ultrastructural and cytochemical studies on the connective tissue of 865
Chemotaxis, responsiveness to, interstitial macrophage subpopulations 427
Chitin, of the squid *Loligo vulgaris*, a periodic structure in the 'pen' 191
Chondroclasts, in osteoneogenesis 93
Chondroid bone, in the teleost fish *Hemichromis bimaculatus*, ultrastructural observations on 371
Chorioallantoic membrane, chick, angiogenesis is associated with collagenous protein synthesis and degradation in the 419
—, cells, differentiation and function of in avian surrogate eggs 65
Coelenterate, -X-ray microanalysis of elements present in the matrix of cnidarian nematocysts 629
Collagen, gels *in vitro* culture of cryopreserved bovine mammary cells on,: synthesis and secretion of casein and lactoferrin 583
—, implants, metal-labeled, ultrastructural and X-ray microanalysis of degradation of 81
—, lattice contraction cell locomotion forces versus cell contraction forces for, an *in vitro* model of wound contraction 407
—, secretion in the dogfish nidamental gland, a radioautographic study of 449
—, ultrastructural and cytochemical studies on the connective tissue of chaetognaths 865
—, ultrastructural studies on the fins of chaetognaths 853
Collagenous protein, synthesis and degradation in the chick chorioallantoic membrane, angiogenesis is associated with 419
—, ligament, the attachment of to stereom, in primary spines of the sea-urchin, *Eucidaris tribuloides* 157
Connective tissue, of chaetognaths, ultrastructural and cytochemical studies on the 865
Corpora allata, of honeybees infected by *Nosema apis* before and after treatment with anti-Nosema drugs, ultrastructure of mitochondria in the 511
Corporea cardiaca, of the honeybee, with and without infection by *Nosema apis* 517
Cortical specialization, formation and ultrastructure of oocytes of the shrimp, *Penaeus vannamei* 879
Crossbridge positions, at the surface of thick filaments, evidence for non-equivalent, orientation of the backbone structure of myosin filaments in relaxed and rigor muscles of the housefly. 803
Crustacea, -high titers of ecdysteroids are associated with the secretory process of embryonic envelopes in the European lobster 269
—, *Panulirus argus*, ultrastructure studies of the extracellular filaments in the ventral nerve cord of 38
—, SEM observations on the interfacial surface of the cement of the adult barnacle attached to natural and synthetic adherends 463
—, shrimp *Penaeus vannamei*, ultrastructure of oocytes of cortical specialization formation 879
Cryofixation, without cryoprotectants, sensory organs in a cavernicolous insect after, : a comparative ultrastructural study 245
Cryopreservation, - in vitro culture of cryopreserved bovine mammary cells on collagen gels: synthesis and secretion of casein and lactoferrin 583
Cryoprotectants, sensory organs in a cavernicolous insect after cryofixation without: a comparative ultrastructural study 245
Cumulus cell, preendocytotic alterations in, gap junctions precede meiotic resumption in the rat cumulus-oocyte complex 827
Cuticle proteins, spatial and temporal variations in, as revealed by monoclonal antibodies. Immuno-blotting analysis and ultrastructural immunolocalization in a beetle, *Tenebrio molitor* 177
Cyclostome, lamprey, ultrastructural features of degeneration of the gallbladder during biliary atresia in 477
Cytoskeleton, -F-actin patterns of in whole-mounted insect Malpighian tubules 283
—, ultrastructural and cytochemical studies on the connective tissue of chaetognaths 865
—, ultrastructural studies on the fins of chaetognaths 853

D

Decidua, -associated protein, identification immunoaffinity; purification and initial characterization of a novel 71 KD human, by use of specific monoclonal antibodies 779
Diapause, in the male silkmoth, *Antheraea polyphemus* 319
Dorsal root, -body cells, innervation of, in *Helix aspersa*: immunocytochemical evidence for the presence of FMRF amide-like substances in nerves and synapses 741
——, terminal in the turtle *Chrysemys d'orbigny*, fine structure and synaptic connections of the 811

E

Ecdysteroids, high titers of, are associated with the secretory process of embryonic envelopes in the European lobster 269
Echinoderm, seasonal patterns of ornithine decarboxylase activity and levels of polyamines in relation to the cytology of germinal cells during spermatogenesis in the sea star *Asterias vulgaris* 435
—, sea urchin, *Eucidaris tribuloides*, attachment of collagenous ligament to stereom in primary spines of 157
Egg development, in oviparae of the vetch aphid, *Megoura viciae*, ultrastructural features of 51
Elasmobranch, radioautographic study of collagen secretion in the dogfish nidamental gland 449
Embryonic, -and adult neurones of the housefly (*Musca domestica*) in culture 337
—, envelopes the secretory process of in the European lobster, associated with high titers of ecdysteroids 269
Enamel, organ cat and ferret, ultrastructural study of tracer permeability 681

Endocytosis, antiport-mediated cell retraction: viable founding and distinctive 785
Endothelial cells, cultured bovine adrenal medulla capillary, morphological behavior of 615
Ependymal cells, primary culture of axolotl spinal cord 601
Epidermal growth factor, and the onset of epithelial epidermal wound healing 123
Epididymis, -and spermatids, capacitated and acrosome-reacted spermatozoa, immunoelectron microscopic distribution of actin in hamster 291
—, and testicular parameters, effect on by submandibular gland removal 263
Epithelial-epidermal wound healing, epidermal growth factor and the onset of 123
Excretory system, site of ultrafiltration in the kidney sac of the pulmonate gastropod *Biomphalaria glabrata* 911
Exocytosis, localization of ferritin in insects 767
Extracellular matrix, filaments in the ventral nerve cord of *Panulirus argus*, ultrastructure studies of 389
——, ultrastructural studies on the fins of chaetognaths 853

F

F-actin patterns, cytoskeletal in whole-mounted insect Malpighian tubules 283
Ferritin, the localization of, in insects 767
Fibronectin, and keratin localization patterns in early wounded confluent PtK2 cells, redistribution of 575
Fins, of chaetognaths, ultrastructural studies on 853
Fish scales, the influence of temperature on the fluorine and calcium composition of 645
Flight muscles, dorso-ventral origin and development of in *Chironomus* (Diptera, Nematocera) 199
Fluorine, and calcium composition of fish scales, the influence of temperature on 645
FMRF -amide-like substances, in nerves and synapses, immunocytochemical evidence for the presence of, innervation of the dorsal body cells of *Helix aspersa* 741
Fowl, domestic ultrastructural localisation of alkaline phosphatase in the inter-tubular tissue of the testis in the 113
Freeze fracture, -and morphometric analyses of intercellular junctions during development of the definitive kidney in lampreys 1
——, preendocytotic alterations in cumulus cell gap junctions precede meiotic resumption in the rat cumulus-oocyte complex 827
Fumagillin, ultrastructural changes in the secretion granules of the hypopharyngeal glands of the honeybee infected by *Nosema apis* and after treatment with 523

G

Gallbladder, during lamprey biliary atresia, ultrastructural features of degeneration of the 477
Gap junctions, preendocytotic alterations in cumulus cell, precede meiotic resumption in the rat cumulus-oocyte complex 827
Gastropod, the site of ultrafiltration in the kidney sac of the pulmonate 911
Gland removal, submandibular on testicular and epididymal parameters 263
Glial system, primary culture of axolotl spinal cord ependymal cells 601
Glycoprotein, identification immunoaffinity purification and initial characterization of a novel 71 KD human decidua associated protein by use of specific monoclonal antibodies 779
Gonotrophic cycle, ultrastructural changes in the abdominal midgut of the mosquito, *Culiseta melanura*, during 895

H

Holoferritin, localization of ferritin in insects 767
Hydra, transmission of symbiotic algae through sexual reproduction in, movement of algae into the oocyte 137
Hydroskeleton, ultrastructural and cytochemical studies on the connective tissue of chaetognaths 865
Hypopharyngeal, glands of the honeybee infected by *Nosema apis*, ultrastructural analysis on the gland secretion in the extracellular ducts of 533
—, glands ultrastructural changes in the secretion granules of, of the honeybee infected by *Nosema apis* and after treatment with fumagillin 523

I

Imaginal disc, cells in primary cultures and during cell aggregation in continuous cell lines, the ultrastructure of 749
Immunochemistry, spatial and temporal variations in cuticle proteins as revealed by monoclonal antibodies. Immuno-blotting analysis and ultrastructural immunolocalization in a beetle *Tenebrio molitor* 177
—, evidence for the presence of FMRF amide-like substances in nerves and synapses, innervation of the dorsal body cells of *Helix aspersa* 741
Immunocytotoxic destruction, of muscles in Diptera 673
Insect, -cavernicolous, -sensory organs in a cavernicolous insect after cryofixation without cryoprotectants: a comparative ultrastructural study 245
—, cavernicolous, -sensory organs in insect after cryofixation without cryoprotectants: a comparative ultrastructural study 245
—, *Chironomus*, origin and development of the dorsoventral flight muscles in 199
—, cleaning oocytes of by dissection and enzyme treatment 349
—, cytoskeletal F-actin patterns of in whole-mounted insect Malpighian tubules 283

—, direct transport of oxygen in insects by large tracheae 239
—, embryonic and adult neurones of the housefly (*Musca domestica*) in culture 337
—, honeybee, -ultrastructure of mitochondria in the corpora allata of honeybees infected by *Nosema apis* before and after treatment with anti-Nosema drugs 511
—, housefly, orientation of the backbone structure of myosin filaments in relaxed and rigor muscles of the housefly: evidence for non-equivalent crossbridge positions at the surface of thick filaments 803
—, immunohistochemical localisation of the thymidine analogue 5-bromo-2-deoxyuridine in insect tissue: Preservation of cellular ultrastructure 311
—, male silkmoth, *Antheraea polyphemus*, -morphogenesis of the antenna of II Differential mitoses of 'dark' precursor cells create the Anlagen of sensilla 705
—, mealworm *Tenebrio molitor*, cellular differentiation in relation to water vapour absorption in the rectal complex of 925
—, morphogenesis of the antenna of the male silkmoth *Antheraea polyphemus* I. The leaf-shaped antenna of the pupa from diapause to apolysis 319
—, morphogenesis of the wing Anlagen in the mealworm beetle *Tenebrio molitor* during the last larval instar 721
—, Mosquito, *Culiseta melanura*, ultrastructural changes in the abdominal midgut of during the gonotrophic cycle 895
—, neural control in the immunocytotoxic destruction of muscles in Diptera 673
—, *Poecilocerus pictus*, ultrastructural spermatid and sperm morphology in with reference to spermeiophagic cells in the testis and sperm duct 71
—, *Saldula saltatoria*, unusual organization of the tropharium in the telotrophic ovarioles of 213
—, *Tenebrio molitor*, spatial and temporal variations in cuticle proteins as revealed by monoclonal antibodies. Immuno-blotting analysis and ultrastructural immunolocalization in 177
—, the localization of ferritin in 767
—, ultrastructural analysis on the gland secretion in the extracellular ducts of the hypopharyngeal glands of the honeybee infected by *Nosema apis* 533
—, the ultrastructure of imaginal disc cells in primary cultures and during cell aggregation in continuous cell lines 749
—, ultrastructural changes in the secretion granules of the hypopharyngeal glands of the honeybee infected by *Nosema apis* and after treatment with fumagillin 523
—, ultrastructural differences of neurosecretion granules in the corporea cardiaca of the honeybee with and without infection by *Nosema apis* 517
—, vetch aphid, ultrastructural features of egg development in oviparae of Buckton 51
Intercellular junctions, during development of the definitive kidney in lampreys: freeze fracture and morphometric analyses 1
——, preendocytotic alterations in cumulus cell gap junctions precede meiotic resumption in the rat cumulus-oocyte complex 827

K

Keratin, and fibronectin localization patterns in early wounded confluent PtK2 cells, redistribution of 575
Kidney, intercellular junctions during development of, in lampreys: freeze fracture and morphometric analyses 1
—, sac of the pulmonate gastropod *Biomphalaria glabrata*, the site of ultrafiltration in 911

L

Lactoferrin, and casein, in vitro culture of cryopreserved bovine mammary cells on collagen gels: synthesis and secretion of 583
Lampreys, intercellular junctions during development of the definitive kidney in, freeze fracture and morphometric analyses 1

M

Macrophage, subpopulations interstitial responsiveness to chemotactic stimuli 427
Malpighian tubules, of whole-mounted insect, cytoskeletal F-actin patterns in 283
Mammary cells, in vitro culture of cryopreserved bovine, on collagen gels: synthesis and secretion of casein and lactoferrin 583
Microsporidian, *Nosema apis*, ultrastructural changes in the secretion granules of the hypopharyngeal glands of the honeybee infected by, and after treatment with fumagillin 523
—, *Nosema apis*, ultrastructural differences of neurosecretion granules in the corporea cardiaca of the honeybee with and without infection by 517
—, *Nosema apis*, ultrastructure of mitochondria in the corpora allata of honeybees infected by, before and after treatment with anti-Nosema drugs 511
—, ultrastructural analysis on the gland secretion in the extracellular ducts of the hypopharyngeal glands of the honeybee infected by *Nosema apis* 533
Midgut, ultrastructural changes in the abdominal, of the mosquito, *Culiseta melanura*, during the gonotrophic cycle 895
Mitochondria, differential, fate of, during spermiogenesis in the ratfish *Hydrolagus* 471
Mollosc, gastropod *Biomphalaria glabrata*, -site of ultrafiltration in the kidney sac of the pulmonate 911
—, *Helix aspersa*, innervation of the dorsal body cells of immunocytochemical evidence for the presence of FMRF amide-like substances in nerves and synapses 741

—, squid, *Loligo vulgaris*, periodic structure in the 'pen' chitin of 191
Monoclonal antibodies, identification immunoaffinity purification and initial characterization of a novel 71KD human decidua associated protein by use of specific 779
——, spatial and temporal variations in cuticle proteins as revealed by. Immuno-blotting analysis and ultrastructural immunolocalization in a beetle, *Tenebrio molitor* 177
Morphogenesis, of the antenna of the male silkmoth, *Antheraea polyphemus*. I. The leaf-shaped antenna of the pupa from diapause to apolysis 319
Morphometry, analysis and freeze fracture of intercellular junctions during development of the definitive kidney in lampreys 1
Mosaicism, in the mouse trophectoderm 103
Muscle, cardiac, differential response of cultured adult cardiac muscle cells to a tumor promotor: analysis of myofibrillar organization 655
—, neural control in the immunocytotoxic destruction of, in Diptera 673
—, orientation of the backbone structure of myosin filaments in relaxed and rigor muscles of the housefly: evidence for non-equivalent crossbridge positions at the surface of thick filaments 803
—, origin and development of the dorso-ventral flight muscles in *Chironomus* (Diptera, Nematocera) 199
Myofibrillar, organization differential response of cultured adult cardiac muscle cells to a tumor promotor: analysis of 655
Myosin filaments, in relaxed and rigor muscles of the housefly, orientation of the backbone structure of, : evidence for non-equivalent crossbridge positions at the surface of 803
Myriapods, intercellular junctions in 359

N

Nematocysts, cnidarian, X-ray microanalysis of elements present in the matrix of 629
Nervous System, embryonic and adult neurones of the housefly (*Musca domestica*) in culture 337
——, fine structure and synaptic connections of the spinal dorsal root terminals in the turtle *Chrysemys d'orbigny* 811
——, innervation of the dorsal body cells of *Helix aspersa*: immunocytochemical evidence for the presence of FMRF amide-like substances in nerves and synapses 741
——, morphogenesis of the antenna of the male silkmoth *Antheraea polyphemus* II. Differential mitoses of 'dark' precursor cells create the Anlagen of sensilla 705
——, ontogenetic development of the brain of the platyhelminth *Fasciola hepatica* 39
——, sensory organs in a cavernicolous insect after cryofixation without cryoprotectants: a comparative ultrastructural study 245
——, ultrastructure studies of the extracellular filaments in the ventral nerve cord of *Panulirus argus* 389
Neurones, embryonic and adult, of the housefly (*Musca domestica*) in culture 337
Nickel nitrate, intercellular permeability to, neonatal and adult adrenal cortex 697
Nidamental gland, dogfish a. radioautographic study of collagen secretion in the 449
Nosema apis, ultrastructural analysis on the gland secretion in the extracellular ducts of the hypopharyngeal glands of the honeybee infected by 533
——, ultrastructural changes in the secretion granules of the hypopharyngeal glands of the honeybee infected by, after treatment with fumagillin 523
——, ultrastructural differences of neurosecretion granules in the corporea cardiaca of the honeybee with and without infection by 517
——, ultrastructure of mitochondria in the corpora allata of honeybees infected by, before and after treatment with anti-Nosema drugs 511
Notochord, of *Xenopus laevis* tadpoles, the cell junctions of 149
Nucleoli, sequential changes in, of human spermatogonia with special reference to rDNA location and transcription 25
Nucleus, double, of the Sertoli cell in the lizard *Anolis carolinesis* 241

O

Oocyte, insect, cleaning by dissection and enzyme treatment 349
—, maturation, preendocytotic alterations in cumulus cell gap junctions precede meiotic resumption in the rat cumulus-oocyte complex 827
—, transmission of symbiotic algae through sexual reproduction in hydra: movement of algae into the 137
—, ultrastructure of, of the shrimp, *Penaeus vanname*: cortical specialization formation 879
Oogenesis, in the acoel turbellarian *Convoluta*, ultrastructural study of 301
Ornithine decarboxylase, seasonal patterns of activity and levels of polyamines in relation to the cytology of germinal cells during spermatogenesis in the sea star, *Asterias vulgaris* 435
Osteoneogenesis, chondroclasts in 93
Ovarioles, telotrophic of an insect, *Saldula saltatoria*, unusual organization of 213
Oviparae, ultrastructural features of egg development in, of the vetch aphid, *Megoura viciae* 51

P

Permeability, intercellular to nickel nitrate, neonatal and adult adrenal cortex 697
Platyhelminth, *Fasciola hepatica*, ontogenetic development of the brain of the 39

—, ultrastructural study of oogenesis in the acoel turbellarian *Convoluta* 301
Polymines, seasonal patterns of ornithine decarboxylase activity and levels of, in relation to the cytology of germinal cells during spermatogenesis in the sea star, *Asterias vulgari* 435
PtK2 cells, early wounded confluent, redistribution of fibronectin and keratin localization patterns in 575

R

rDNA, with special reference to location and transcription, sequential changes in the nucleoli of human spermatogonia 25
Rectal complex, of the mealworm, *Tenebrio molitor*, cellular differentiation in relation to water vapour absorption in the 925
Reproductive System, cleaning insect oocytes by dissection and enzyme treatment 349
——, differential fate of mitochondria during spermiogenesis in the ratfish *Hydrolagus* 471
——, differentiation and function of chorioallantoic cells in avian surrogate eggs 65
——, double nucleus of the Sertoli cell in the lizard *Anolis carolinesis* 241
——, effect of submandibular gland removal on testicular and epididymal parameters 263
——, immunoelectron microscopic distribution of actin in hamster spermatids and epididymal capacitated and acrosome-reacted spermatozoa 291
——, preendocytotic alterations in cumulus cell gap junctions precede meiotic resumption in the rat cumulus-oocyte complex 827
——, seasonal patterns of ornithine decarboxylase activity and levels of polyamines in relation to the cytology of germinal cells during spermatogenesis in the sea star *Asterias vulgaris* 435
——, sequential changes in the nucleoli of human spermatogonia with special reference to rDNA location and transcription 25
——, transmission of symbiotic algae through sexual reproduction in hydra: movement of algae into the oocyte 137
——, ultrastructural localisation of alkaline phosphatase in the inter-tubular tissue of the testis in the domestic fowl 113
——, ultrastructural spermatid and sperm morphology in *Poecilocerus pictus* with reference to spermeiophagic cells in the testis and sperm duct 71
——, ultrastructural study of oogenesis in the acoel turbellarian *Convoluta* 301
——, ultrastructure of oocytes of the shrimp *Penaeus vannamei*: cortical specialization formation 879
Reptile, double nucleus of the Sertoli cell in the lizard *Anolis carolinesis* 241
—, scanning electron microscopic study of blood cell surfaces of the middle Asian tortoise *Testudo horsfieldi* 385
Respiratory System, direct transport of oxygen in insects by large tracheae 239
——, properties of the lining membrane of the insect tracheal system 231
——, regulation of air and blood flow through the booklungs of the desert scorpion *Paruroctonus mesaensis* 547
Rigor muscles, of the housefly, orientation of the backbone structure of myosin filaments in: evidence for non-equivalent crossbridge positions at the surface of thick filaments 803

S

Scorpion, desert, *Paruroctonus mesaensis*, regulation of air and blood flow through the booklungs of 547
Sea-urchin, *Eucidaris tribuloides*, the attachment of collagenous ligament to stereom in primary spines of the 157
Secretory process, of embryonic envelopes in the European lobster, associated with high titers of ecdysteroids 269
Sensilla, differential mitoses of 'dark' precursor cells create the Anlagen of, morphogenesis of the antenna of the male silkmoth, *Antheraea polyphemus* 705
Sensory organs, in a cavernicolous insect after cryofixation without cryoprotectants: a comparative ultrastructural study 245
Sertoli cell, the double nucleus of, in the lizard *Anolis carolinesis* 241
Silkmoth, *Antheraea polyphemus*, morphogenesis of the antenna of the male I. The leaf-shaped antenna of the pupa from diapause to apolysis 319
Sperm morphology, and ultrastructural spermatid in *Poecilocerus pictus* with a reference to spermeiophagic cells in the testis and sperm duct 71
Spermatogenesis, in the sea star *Asterias vulgaris*, seasonal patterns of ornithine decarboxylase activity and levels of polyamines in relation to the cytology of germinal cells during 435
Spermatozoa, epididymal capacitated and acrosome-reacted, the immunoelectron microscopic distribution of actin in hamster spermatids and 291
Spermatogonia, human sequential changes in the nucleoli of, with special reference to rDNA location and transcription 25
Spermatids, immunoelectron microscopic distribution of actin in hamster 291
—, ultrastructural and sperm morphology in *Poecilocerus pictus* with reference to spermeiophagic cells in the testis and sperm duct 71
Spermiogenesis, in the ratfish *Hydrolagus*, differential fate of mitochondria during 471
Spinal cord, ependymal cells in axolotl, primary culture of 601
Stereom, in primary spines of the sea-urchin, *Eucidaris tribuloides*, the attachment of collagenous ligament to 157
Submandibular gland, effect of removal on testicular and epididymal parameters 263
Synaptic connections, of the spinal dorsal root terminals in the turtle *Chrysemys d'orbigny* 811

T

Teleost, differential fate of mitochondria during spermiogenesis in the ratfish *Hydrolagus* 471
—, fish *Hemichromis bimaculatus*, ultrastructural observations on chondroid bone in 371
—, fish scale, the influence of temperature on the fluorine and calcium composition of 645
Testis, and epididymal parameters, effect on by submandibular gland removal 263
—, and sperm duct, ultrastructural spermatid and sperm morphology in *Poecilocerus pictus* with a reference to spermeiophagic cells in the 71
—, in the domestic fowl, ultrastructural localisation of alkaline phosphatase in the inter-tubular tissue of the 113
Thymidine, analogue 5-bromo-2-deoxyuridine, immunohistochemical localisation of in insect tissue: Preservation of cellular ultrastructure 311
Tissue Culture, angiogenesis is associated with collagenous protein synthesis and degradation in the chick chorioallantoic membrane 419
——, antiport-mediated cell retraction: viable founding and distinctive endocytosis 785
——, cell locomotion forces versus cell contraction forces for collagen lattice contraction: an *in vitro* model of wound contraction 407
——, embryonic and adult neurones of the housefly (*Musca domestica*) in culture 337
——, *in vitro* culture of cryopreserved bovine mammary cells on collagen gels: synthesis and secretion of casein and lactoferrin 583
——, morphological behavior of cultured bovine adrenal medulla capillary endothelial cells 615
——, primary culture of axolotl spinal cord ependymal cells 601
——, redistribution of fibronectin and keratin localization patterns in early wounded confluent PtK2 cells 575
——, ultrastructure of imaginal disc cells in primary cultures and during cell aggregation in continuous cell lines 749
Tortoise, Asian, *Testudo horsfieldi*, scanning electron microscopic study of blood cell surfaces of 385
Tracer, nickel nitrate, neonatal and adult adrenal cortex: intercellular permeability to 697
—, permeability through the cat and ferret enamel organ, ultrastructural study of 681
Tracheal system, insect, the properties of the lining membrane of 231
Tracheae, large, the direct transport of oxygen in insects by 239
Tropharium, in the telotrophic ovarioles of an insect, *Saldula saltatoria*, unusual organisation of 213
Trophectoderm, mosaicism in the mouse 103
Tumor promotor, differential response of cultured adult cardiac muscle cells to: analysis of myofibrillar organization 655

U

Ultrafiltration, the site of, in the kidney sac of the pulmonate *gastropod Biomphalaria glabrata* 911

V

Ventral nerve cord, of *Panulirus argus*, ultrastructure studies of the extracellular filaments in the 389

W

Water vapour, absorption in the rectal complex of the mealworm, *Tenebrio molitor* 925
Wing Anlagen, morphogenesis of, in the mealworm beetle *Tenebrio molitor* during the last larval instar 721
Wound contraction, cell locomotion forces versus cell contraction forces for collagen lattice contraction: An in vitro model of 407
Wound healing, epidermal growth factor and the onset of epithelial epidermal 123

X

X-ray microanalysis, of elements present in the matrix of cnidarian nematocysts 629
